

## **List of Lab Assignments of Object Oriented Programming Lab (PCCCST593)**

**Object passing, recursive function, call by value, call by reference, public, protected usage, implementation of stack or queue**

- Write a program to find out factorial of a number using recursion.
- Write a program to show call by reference using member variables of an object.
- Work with default and public member variables of a class. Set values and display values from main().
- Implement a stack or queue using array.
